### Graphic design elements

- **Graphic design elements** are the foundation of graphics.
  - Line
  - Shape
  - Space
  - Color & Value
  - Texture

### Lines

**LINE**

- Horizontal lines are calm and quiet
- Vertical lines suggest more of a potential for movement.
- Diagonal lines strongly suggest movement and give more of a feeling of vitality to a picture.

### Shapes

**SHAPE**

- A shape is defined as an area that stands out from the space next to it or around.
- A shape is formed when a line encloses an area.
- Shapes can vary endlessly and can suggest physical form and direct eye movement.
- Simple shapes are remembered and understood more easily than complex shapes.

Simple Shape      Complex Shape

Space

**SPACE**

- Size & vertical location
- Overlapping

Copyright 2010 Adobe Systems Incorporated. All rights reserved.

Space

**SPACE - 2D or 3D**

- Detail (aerial or atmospheric perspectives)
- Linear perspective (converging lines)

Color & Value

**COLOR & VALUE**

- Value is the relative degree of lightness and darkness in a design element.
- Line, color, texture, and shape all need value contrast in order to be seen.
- Value is used to describe objects, shapes, and space.
- Dark areas tend to denote: gloom, mystery, drama, and menace

Color and value

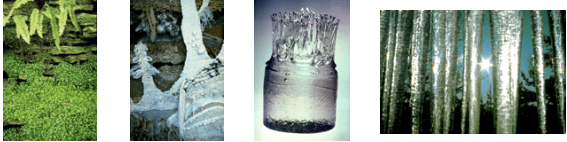

- Using color can enhance or detract from a composition.
- Color wheels help determine which colors are in greatest contrast.

Use Adobe Color Wheel to try out new color schemes:

### Graphic design principles

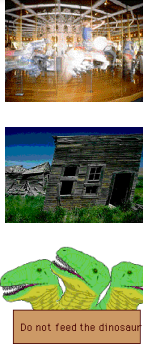

- Graphic design principles are ways in which elements are used together.
  - Movement
  - Balance
  - Emphasis
  - Unity

### Movement

**MOVEMENT**

- Motion or movement in a visual image occurs when objects seem to be moving in a visual image.
- Diagonal lines tend to create the illusion of movement or motion.
- Similar shapes connected with each other or overlapping each other can imply movement or restlessness.

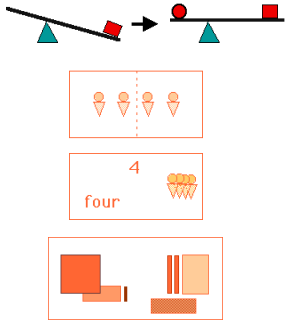

Do not feed the dinosaur

### Balance

**BALANCE**

- Balance is a psychological sense of equilibrium.
- Balance places the parts of a visual in an aesthetically pleasing arrangement.
- Balance can be formal when both sides are symmetrical
- Balance can be informal when sides are not exactly symmetrical
- Informal balance is more dynamic than formal balance and normally keeps the learner's attention focused on the visual message.

### Emphasis

**EMPHASIS**

- Emphasis by contrast
- Emphasis on isolation

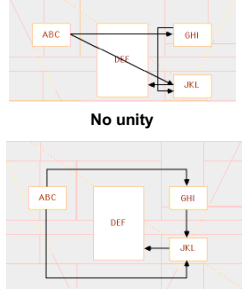

Copyright 2010 Adobe Systems Incorporated. All rights reserved. 13

### Unity

**UNITY**

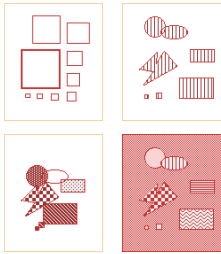

- Unity is the relationship among the elements of a visual
- Unity helps organize a visual image to facilitate understanding.

### Unity (cont)

- Unity can be achieved through the use of similar shapes.
- Unity can be achieved through the use of a common pattern.
- Unity can be achieved through the use of space.
- Unity can be achieved through the use of a common background.

### Unity

- What is the focus of the message?

Copyright 2010 Adobe Systems Incorporated. All rights reserved. 16

### Emphasis

- What message is stressed here?

17

### Summary

- The basis of good graphic design is use of design elements and their thoughtful application in the form of design principles.
- Clearly identify what you are trying to accomplish — use design to convey your message.
- Brainstorm alternatives.
